Artica Arts – Practice 2026

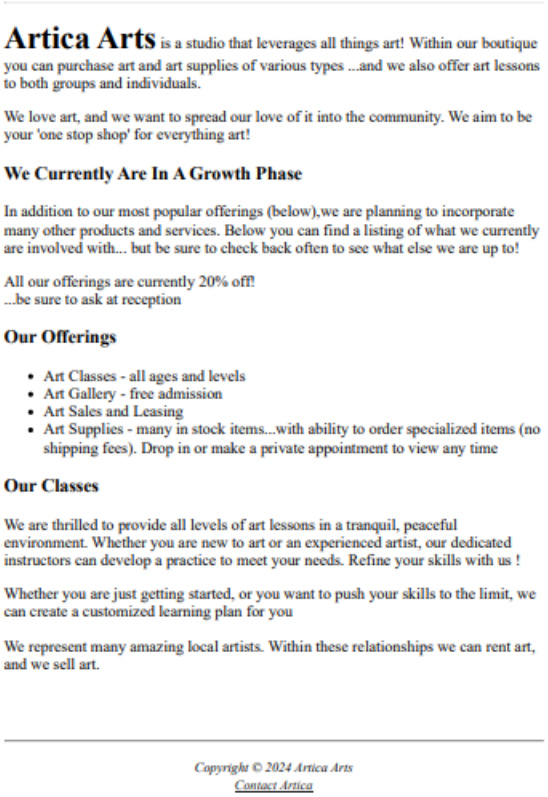

Use the starter files provided. Be sure to fix anything in the starter that is not correct. View the walkthrough video. The Color scheme names are listed in the CSS Starter file in **comments**.

- **Use the CSS file provided for the main external styles that you will create**. ALL styles must be placed in external stylesheets. The page background uses the dark red colour **[A]**
- The font for mostly everything in the page (unless otherwise specified) is either Lucida Sans or Tahoma or Garamond or sans serif **[A]**
- The wrapper has rounded corners – use 10px for that, it also has a width of 75% and the space above and below it is 5%. It is contained within a 1px black border. **[A]**
- Ensure there is 5% space inside the wrapper around the content to the left and right as well as the appropriate amount of space outside the wrapper so the body bgcolor is visible. The wrapper bgcolor is the off white color **[A]**
- Links that are visited are pale red, untouched links are dark red, and when your mouse hovers over a link it has a background of ffff00 (view video) **[A]**
- The navigation should have space below it of 1em. Its text should be centered and as bold as is possible **[B]**
- The horizontal dividing line below the navigation is **not** an hr tag. It has a colour of dark red and it's thickness is 2px **[B]**
- The large text that says 'Artica Arts' is the basic dark red color , the font for those words are two times the font size and should be made as bold as is possible and italic (use a reusable style to accomplish this) **[B]**
- The logo should be inserted properly (remaining inside an images folder – do not use absolute paths or leave the image outside of the images folder) **[B]**
- The '20% off' sidebar has a dark red border that is 2px wide, the width of the sidebar is 15%. It has no margin on the top, a font size of **.8** of the regular font size. Adjust the spacing outside of the sidebar, and in around the content of the sidebar as needed (estimate it). **[B]**
- Create the appropriate links that jump to the proper points in the same page, and link to the Contact page. The contact page is simply a wrapper that contains a heading that is the second largest heading, with the appropriate email tag created within it **[B]**

- h2 and h3 level headings should be dark red , note that some are italicized (implement as shown), header and footer should have centered content . Any instance of the company name should have its style applied by a reusable named class. **[B]**
  - The hyperlinks should be working as shown in the video, additionally the email link should be a working email. **[C]**
  - The print stylesheet should result in what is shown in the second video and in the screenshot to the left
